1

Agenda

- Status quo: What happened
 - WP 1: Project Management
 - WP 2: Communication
 - WP 3: Development of innovative protocols for the perception of environmental pollution through waste from stone processing
 - WP 4: Identify / develop new best practices for recycling Waste as a secondary raw material

www.e-c-o.at

2

Status quo

WP 1: Project management

- Ongoing process
- Project coordination
- Project communication with LP/PP
- Internal meetings (planning, budget, communication)
- External meeting with Lead Partner (virtual)
- Reporting

3

Status quo

WP 2: Communication

- Coordinating the communication concept and plan
- Creating content, postings
- Monitoring
- Website - Interactive video about the LBI as promotional and informative material
- Poster

6

Intro: The basis of the long-term biodiversity index (LBI) is the ratio between potential and actual biodiversity

The biodiversity is calculated by the number of different species and their rating in the Red List of threatened species

LBI_{pot}

LBI_{act}

9

Intro: Implementation of the LBI

- Goal: various test sites in Italy and Austria
- Sites with different mineral extraction types
- Involve local experts for the different species groups
- Indicators
 - highly significant in terms of relevant parameters
 - easy to assess
 - relevant in terms of nature conservation (national and international)

10

Status quo

WP 3: Development of innovative protocols for the perception of environmental pollution through waste from stone processing

Test sites

- Determination of test sites in Austria
 - One test site in Carinthia
 - Jakoministeinbruch from Mineral Group (Strabag)
 - confirmed cooperation
 - Data collection started already
 - Birds, vegetation
 - Drone flight

Status quo

WP 3: Development of innovative protocols for the perception of environmental pollution through waste from stone processing

Test sites

- Determination of test sites in Austria
 - One test site in Tyrol
 - Quarry Lahntal from Mineral Group (Strabag)
 - confirmed cooperation
 - kick-off meeting
 - first visit
 - Drone flight
 - Data collection will start in 2021

12

Status quo

WP 3: Development of innovative protocols for the perception of environmental pollution through waste from stone processing

Test sites

- Determination of test sites in Italy
 - Kick-off meeting in August 2020 at Consorzio Produttori Pietra Piasentina with LP
 - 2 quarry companies confirmed their cooperations
 - First visit of quarries in October 2020
 - Inspection of production in October 2020
 - Data collection will start in March 2021
 - Local experts (vegetation ecologist, ornithologist) will be involved

13

Status quo

WP 3: Development of innovative protocols for the perception of environmental pollution through waste from stone processing

Analysis of local legislation for quarry's waste

- Analysis of austrian legislation started
- The analysis includes also international and national guidelines
- Legal classification of the LBI
- Need and requirement of biodiversity monitoring

14

Status quo

WP 3: Development of innovative protocols for the perception of environmental pollution through waste from stone processing

Development of procedures to minimize environmental impacts

- Basic determination
- Method workshops
- LBI Screening

Covid-19

- Due to current Covid-19 situation delays throughout the project can be detected.
- Our project managers started working from home since March. We are still partially in home office.
- The milestone specified in the project application in relation to the project's dissemination plan has changed
- Meetings in Italy could not take place as planned
